Skills

JavaScript, Python, React, Node.js, Redux, Flask, SQL, SQLAlchemy, PostgreSQL, Express, Sequelize, HTML5, CSS3, Rest APIs, Object Oriented Programming, Test Driven Development, AWS, Git, Heroku, Docker, Pair Programming

Language - *English and Spanish Native bilingual proficiency*

Projects

meScroll - a social media platform that allows users to post, like, edit their profile, and leave comments [live site](#) | [github](#)

Python, JavaScript, React/Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku, AWS, Docker

- Utilized Python/Flask back-end to create REST API endpoints with CRUD operations
- Connected AWS S3 bucket through API POST endpoint to reduce server load, increase user experience by providing an easy to use local file photo upload form
- Utilized React Modals to create a dynamic frontend architecture leading to an easy and clear user experience
- Leveraged Redux state management to dynamically render the users comments, likes, and user profile updates for a seamless user experience

Stays - a homestay listing site, users can list a stay, book a stay, and leave comments and ratings

[live site](#) | [github](#)

JavaScript, React/Redux, Express.js, Sequelize, PostgreSQL, HTML5, CSS3, Heroku

- Managed scheduling and booking CRUD through custom database operations with PostgreSQL
- Leveraged JSX conditional statements to ensure user privacy and autonomy allowing users to only access their own created listings or their own created bookings
- Utilized Redux reducer functions to efficiently store and update the application state, in turn creating a smoother and instant user interaction experience

Snacksy - a marketplace for snacks, users can list snacks, and add them to their shopping cart

[live site](#) | [github](#)

Python, JavaScript, React, Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku

- Collaborated on a team of 4 developers, implemented core features with appropriate task delegation and maintained clear and constant communication throughout github pull requests and merge conflicts
- Managed production database and heroku deployment to ensure bug-free feature transitions from development to production

Experience

Social Media Manager - FLP Engineering | September 2021 - February 2022

- Create thoughtful and intentional social media posts for Instagram, Facebook, and TikTok to promote FLP product and in return increased audience engagement and product sales
- Interact with potential customers on social media and showcase company culture throughout every interaction, including: direct messages, post comments and story interactions
- Record, edit and upload Youtube video tutorials using Final Cut Pro and Adobe Photoshop, to help guide customers in FLP part installation

Photographer/Videographer - SalcidoMedia - Self Employed | February 2018 - January 2022

[Portfolio](#)

- Document and capture meaningful moments in the lives of my clients through photography and videography
- Worked 1-on-1 with clients throughout scheduling, photography session, and delivering the finished product

Education

App Academy | February 2022 - August 2022 | Online-Remote

Immersive 24-week software development course, with focus on both front-end and back-end web development
