## SKILLS

JavaScript, React, Node, Redux, Python, Flask, SQL, SQLAlchemy, Postgres, Express, Sequelize, HTML, CSS, Rest API, Object Oriented Programming, Test Driven Development, AWS, Git, Heroku, Docker, Pair Programming

**Language** - *English and Spanish native bilingual proficiency*

## PROJECT EXPERIENCE

**meScroll** - a social media platform that allows users to post, like, edit their profile, and leave comments [live site](#) | [github](#)

Python, JavaScript, React.js, Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku, AWS, Docker

- Integrated **AWS S3** to store image files, maximizing database efficiency and improving page-load performance
- Built React Modals to create a dynamic frontend architecture leading to an easy and clear user experience
- Leveraged **Redux** state management to dynamically render the users comments, likes, and user profile updates for a seamless user experience
- Developed a **Python/Flask** back-end to create **REST API** endpoints with full CRUD operations

**Stays** - a homestay listing site, users can list a stay, book a stay, and leave comments/ratings [live site](#) | [github](#)

JavaScript, React/Redux, Express.js, Node.js, Sequelize, PostgreSQL, HTML5, CSS3, Heroku

- Formed JSX conditional statements to ensure user privacy and autonomy allowing users to only access their own created listings or their own created bookings
- Customized **HTML** date input with **useState** variables to avoid user errors while booking, such as booking dates in the past or booking dates backward during checkout and check-in
- Facilitated scheduling and booking CRUD through custom database operations with **PostgreSQL**
- Utilized **Redux** reducer functions to efficiently store and update the application state, in turn creating a smoother and instant user interaction experience

**Snacksy** - a marketplace for snacks, users can list snacks, and add them to their shopping cart [live site](#) | [github](#)

Python, JavaScript, React, Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku

- Collaborated on a team of 4 developers, implemented core features with appropriate task delegation, and maintained clear and constant communication throughout **github** pull requests and merge conflicts
- Managed production database and **heroku** deployment to ensure bug-free feature transitions from development to production

## WORK EXPERIENCE

**Social Media Manager** - FLP Engineering | September 2021 - February 2022

- Created thoughtful and intentional social media posts for Instagram, Facebook, and TikTok to promote FLP products and in turn significantly increased audience engagement and product sales
- Interacted with potential customers on social media and showcased company culture throughout every interaction, including direct messages, post comments, and story interactions
- Recorded, edited, and uploaded Youtube video tutorials using Final Cut Pro and Adobe Photoshop, to help guide customers in FLP part installation

**Photographer/Videographer** - SalcidoMedia - Self-Employed | February 2018 - January 2022 [Portfolio](#)

- Documented and captured meaningful moments in the lives of clients through photography and videography
- Professionally communicated and worked with clients throughout scheduling, the photography session, and the delivery of the finished product

## EDUCATION

**App Academy** | February 2022 - August 2022 | Online-Remote

Immersive 1000+ hour software development program, with a focus on full-stack web development
