Joshua Salcido Software Developer

t: **720.225.8079**   e: **joshuasalcido21@gmail.com**   **Denver, CO**   Portfolio   Linkedin   Github

SKILLS

JavaScript, React, Node, Redux, Python, Flask, SQL, SQLAlchemy, Postgres, Express, Sequelize, HTML, CSS, Rest API, Object Oriented Programming, Test Driven Development, AWS, Git, Heroku, Docker, Pair Programming

Language - *English* and *Spanish* native bilingual proficiency

PROJECT EXPERIENCE

meScroll - *a social media platform that allows users to post, like, edit their profile, and leave comments* live site | github

Python, JavaScript , React.js , Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku, AWS, Docker

- Integrated **AWS S3** to store image files, maximizing database efficiency and improving page-load performance
- Built React Modals to create a dynamic frontend architecture leading to an easy and clear user experience
- Leveraged **Redux** state management to dynamically render the users comments, likes, and user profile updates for a seamless user experience
- Developed a **Python/Flask** back-end to create **REST API** endpoints with full CRUD operations

Stays - *a homestay listing site, users can list a stay, book a stay, and leave comments/ratings*   live site | github

JavaScript , React/Redux , Express.js , Node.js , Sequelize, PostgreSQL , HTML5, CSS3 , Heroku

- Formed JSX conditional statements to ensure user privacy and autonomy allowing users to only access their own created listings or their own created bookings
- Customized **HTML** date input with **useState** variables to avoid user errors while booking, such as booking dates in the past or booking dates backward during checkout and check-in
- Facilitated scheduling and booking CRUD through custom database operations with **PostgreSQL**
- Utilized **Redux** reducer functions to efficiently store and update the application state, in turn creating a smoother and instant user interaction experience

Snacksy- a marketplace for snacks, users can list snacks, and add them to their shopping cart   live site | github

Python, JavaScript , React, Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku

- Collaborated on a team of 4 developers, implemented core features with appropriate task delegation, and maintained clear and constant communication throughout **github** pull requests and merge conflicts
- Managed production database and **heroku** deployment to ensure bug-free feature transitions from development to production

WORK EXPERIENCE

Coding Instructor - Code Ninjas | April 2023 - Present

- Provide individualized support and feedback to students, help them understand coding principles, and build confidence in their knowledge of Javascript fundamentals and C#..
- Fostered a love of learning and a growth mindset in students, emphasizing the importance of perseverance, problem-solving, and collaboration in achieving success.
- Lead summer workshops covering fundamentals of encryption, Minecraft development, and Roblox Studio

Social Media Manager - FLP Engineering | September 2021 - February 2022

- Created and curated content for social media channels (e.g. Facebook, Instagram, TikTok, YouTube) that engaged and grew social media audience, and in turn increased product sales.
- Managed social media accounts, including scheduling posts, responding to comments/messages and ensuring brand consistency and voice.

VOLUNTEERING
