Joshua Salcido Software Engineer

t: 720.225.8079   e: joshuasalcido21@gmail.com   Denver, CO   Portfolio   Linkedin   Github

SKILLS

JavaScript, React, Node, Redux, Python, Flask, SQL, SQLAlchemy, Postgres, Express, Sequelize, HTML, CSS, Rest API, Object Oriented Programming, Test Driven Development, AWS, Git, Heroku, Docker, Pair Programming

Language - *English* and *Spanish* native **bilingual proficiency**

PROJECT EXPERIENCE

meScroll - *a social media platform that allows users to post, like, edit their profile, and leave comments* live site | github

Python, JavaScript , React.js , Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku, AWS, Docker

- Integrated **AWS S3** to store image files, maximizing database efficiency and improving page-load performance
- Built React Modals to create a dynamic frontend architecture leading to an easy and clear user experience
- Leveraged **Redux** state management to dynamically render the users comments, likes, and user profile updates for a seamless user experience
- Developed a **Python/Flask** back-end to create **REST API** endpoints with full CRUD operations

Stays - *a homestay listing site, users can list a stay, book a stay, and leave comments/ratings*   live site | github

JavaScript , React/Redux , Express.js , Node.js , Sequelize, PostgreSQL , HTML5, CSS3 , Heroku

- Formed JSX conditional statements to ensure user privacy and autonomy allowing users to only access their own created listings or their own created bookings
- Customized **HTML** date input with **useState** variables to avoid user errors while booking, such as booking dates in the past or booking dates backwards during checkout and check-in
- Facilitated scheduling and booking CRUD through custom database operations with **PostgreSQL**
- Utilized **Redux** reducer functions to efficiently store and update the application state, in turn creating a smoother and instant user interaction experience

Snacksy- a marketplace for snacks, users can list snacks, and add them to their shopping cart   live site | github

Python, JavaScript , React, Redux, Flask, SQLAlchemy, HTML5, CSS3, Heroku

- Collaborated on a team of 4 developers, implemented core features with appropriate task delegation and maintained clear and constant communication throughout **github** pull requests and merge conflicts
- Managed production database and **heroku** deployment to ensure bug-free feature transitions from development to production

WORK EXPERIENCE

Social Media Manager - FLP Engineering | September 2021 - February 2022

- Created thoughtful and intentional social media posts for Instagram, Facebook, and TikTok to promote FLP product and in turn increased audience engagement and product sales
- Interacted with potential customers on social media and showcase company culture throughout every interaction, including: direct messages, post comments and story interactions
- Recorded, edited and uploaded Youtube video tutorials using Final Cut Pro and Adobe Photoshop, to help guide customers in FLP part installation

Photographer/Videographer - SalcidoMedia - Self Employed | February 2018 - January 2022   Portfolio

- Documented and captured meaningful moments in the lives of clients through photography and videography
- Professionally communicate and work with clients throughout scheduling, photography session, and the delivery of the finished product

EDUCATION

App Academy | February 2022 - August 2022 | Online-Remote

Immersive 1000+ hour software development program, with focus on full-stack web development
