Skills

JavaScript, Python, React.js, Redux, Flask, SQL, SQLAlchemy, postgreSQL, Express, Sequelize, HTML5, CSS3, AWS, Git, Heroku, Docker, Adobe PhotoShop

Projects

meScroll   [live site](#) | [github](#)

Python, JavaScript , React, Redux, Flask, SQLAlchemy, AWS, Docker, Heroku, HTML5, CSS3

meScroll is a social media platform that allows logged in users to create and upload their own photo posts, edit their own user profile, and leave comments and likes on other users' posts.

- Utilized Python/Flask back-end to create REST API endpoints with CRUD operations
- Connected AWS S3 bucket through API POST endpoint to reduce server load, increase user experience by providing an easy to use local file photo upload form
- Utilized React Modals to improve component architecture leading to an easy and clear user experience
- Leveraged Redux state management to dynamically render the users comments, likes, and user profile updates for a seamless user experience

Stays   [live site](#) | [github](#)

JavaScript , React, Redux , Express, Sequelize, SQL , HTML5, CSS3 , Heroku ,

Stays allows logged in users to browse through existing homestay listings, book a listing, create a listing of their own, and leave reviews and ratings on any existing listings

- Designed an intuitive interface with React components and Redux state management to provide an easy to navigate user experience
- Incorporated Redux state management to efficiently and dynamically allow users to update their listings
- Implemented front and back end user authentication, to create a coherent user login and sign up experience

Experience

Social Media Manager | September 2021 - February 2022

FLP Engineering

- Created thoughtful and intentional social media posts for Instagram, Facebook, and TikTok to promote FLP product and in return increased audience engagement and product sales
- Interact with potential customers on social media and showcase company culture throughout every interaction, including: direct messages, post comments and story interactions
- Record, edit and upload Youtube video tutorials using Final Cut Pro and Adobe Photoshop, to help customers with part installation

Photographer-Videographer | February 2018 - January 2022   [live site](#)

SalcidoMedia - Self Employed

- Document and capture meaningful moments in the lives of my clients through photography and videography
- Work one on one with clients throughout the process of scheduling, the photography session, and delivering there finished product
- Schedule social media posts for consistent branding/marketing, and update my portfolio website on a regular basis

Education

App Academy | February 2022 - August 2022 | Online-Remote

Immersive 24-week software development course, with focus on both front-end and back-end web development
